LEVERAGE AND CONNECT PARKS AND RECREATION TO IMPROVE COMMUNITY HEALTH

Strategy H1

FRPA will engage, align and collaborate with State Health and Agriculture, Universities, Health Care Agencies and Health Care Providers, and Design Excellence Partners.

- 1 Identify and develop a framework for engagement with partners around the state to strengthen the tie between parks and recreation and community health.
- 2 Identify the research agendas at Florida Universities and other organizations, relative to community health initiatives. Connect with these programs for possible collaborations.
- 3 Continue to grow the number of agencies that have signed the State of Health and Wellness Pledge and support those that have.
