

COLOR HIKE

Equipment: deck of paint color cards from your local hardware store

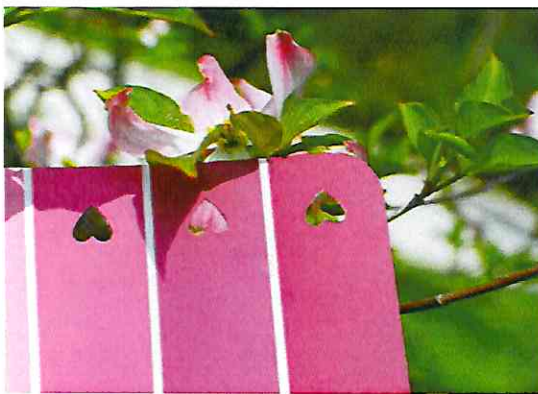

Ages; K-5th, 6-8th if you add some challenges to it.

Put paint chip cards of different colors on a binder ring, and punch a large hole in each shade. (some paint cards come with square holes already if you can find them) Go outside and try to match all the colors!!

There was lots of running — great exercise!...and excitement when colors were matched!

Some colors may be harder to find than others. So many different hues were found!

You may even notice little things like the different shades of green on each side of the same leaf, or....

....that larger dandelions are a shade darker than little ones.

Have fun!!
